## Abstract

An embodiment of the invention includes an efficient errorcontrol system and method for recovering packet losses,
especially losses in distributing multicast video over broadband
residential networks. Preferably, unlike most existing errorcontrol algorithms designed for Internet multicast, the system
and method does not employ substantial feedback suppression.
Preferably, the system and method does not employ substantial
multicasted retransmission. Preferably, the system and method
does not employ substantial parity retransmission. Preferably,
the system and method does not employ substantial local loss
recovery. The system and method integrates two existing classes
of error-control algorithms: Automatic Repeat Request (ARQ) and
Forward Error Correction (FEC), to reduce traffic overhead and
achieve scalability.
